

To our valued customer,

As of December 31st 2014, WTC stopped production of all MedWeld 3000 integrated products. This integrated technology has served our integration partners such as PLC and robot manufacturers with high speed I/O communications solutions for the past 23 years.

Standardization of Field bus technology such as Ethernet/IP, Device Net, PROFIBUS, and PROFINET have all surpassed the advantage of the MedWeld 3000 product line.

We invite you to review the WT6000 AC & MFDC products for your Field bus requirements through our website or contact your local sales account manager.

WTC intends to support the MedWeld 3000 product line with spare components up until April 1, 2020, and repairs (subject to availability of components) up until April 1, 2022.

We would like to thank you for your support and consideration of WTC products, and look forward to supporting you in the future.

Best Regards

Steve Coe
Director of Sales & Marketing
Welding Technology Corporation
